I. Completed Use Case Diagram:

II. Use Case Descriptions

1.1 CreateAcc

Use Case ID	1.1
Use Case Name	CreateAcc
Created By	Savanur Akash
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	Allows a person to create an account on SingScape to become a user
Preconditions	None
Postconditions	An account with a specific role (Admin or User) will be created for the user
Priority	High
Frequency of use	High
Flow of events	<ol style="list-style-type: none">1. The system prompts the User to create an account by entering their full name, email and password2. The User enters the required information and clicks the 'Create Account' button to submit the inputs.3. The system prompts the User to verify their email by entering an OTP sent to the entered email.4. An account with a specific role (Admin or User) will be created for the user
Alternative Flows	<ol style="list-style-type: none">1. If the User selects the back navigation icon, the system will navigate the User to the login page.
Exceptions	<ol style="list-style-type: none">1. If any required information is missing or invalid, an error message is displayed.
Includes	None
Special Requirements	System needs to validate user input data.
Assumptions	None
Notes and Uses	None

1.2 LoginAcc

Use Case ID	1.2
Use Case Name	LoginAcc
Created By	Savanur Akash
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	Allows a person to login to their account on SingScape using their email and password
Preconditions	None
Postconditions	User is logged into SingScape and is navigated to the home screen of the application
Priority	High
Frequency of use	High
Flow of events	<ol style="list-style-type: none">1. The system prompts the User to login to their account by entering their email and password2. The User enters his/her email and password. The password is masked as dots, but the User can choose to unmask it by clicking on the eye icon.3. The User selects the "Login" button.
Alternative Flows	<ol style="list-style-type: none">1. If the user does not have a registered account, he/she will click on the 'Create Account' button to navigate to the account creation page2. If the user has forgotten their password, he/she can click on 'Forgot Password' button.3. The system will send an OTP to the user's email which the user can enter to login.
Exceptions	<ol style="list-style-type: none">1. If any required information is missing or invalid, an error message is displayed.2. If email and password do not match when the User tries to login in Step 4, SingScape shall display "Email and password do not match" to the user.
Includes	None
Special Requirements	System needs to validate user input data.
Assumptions	User has a registered account
Notes and Uses	None

1.3 AccessAcc

Use Case ID	1.3
Use Case Name	AccessAcc
Created By	Savanur Akash
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	The system redirects the user to the homepage after authentication and lets them access their account
Preconditions	The user either has to create an account or login
Postconditions	The user has access to edit their profiles or making bookings
Priority	High
Frequency of use	High
Flow of events	<ol style="list-style-type: none">1. The system validates the register or login request2. After validation, the system redirects them to the home page
Alternative Flows	None
Exceptions	None
Includes	User logs in
Special Requirements	None
Assumptions	User has a registered account
Notes and Uses	None

1.4 ViewProfile

Use Case ID	1.4
Use Case Name	ViewProfile
Created By	Savanur Akash
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	Allows a User to view to their profile details on SingScape
Preconditions	The user has to be logged in successfully
Postconditions	The user has authority to edit their profile
Priority	High
Frequency of use	Low
Flow of events	1. The system displays the User's account details including name, email, phone number and booking history
Alternative Flows	2. The User is navigated to the home page if the back navigation button is clicked.
Exceptions	None
Includes	None
Special Requirements	None
Assumptions	None
Notes and Uses	None

1.5 EditProfile

Use Case ID	1.5
Use Case Name	EditProfile
Created By	Savanur Akash
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	Allows a User to view to their profile details on SingScape
Preconditions	The user has access to their account
Postconditions	The user is able to edit personal information or change password
Priority	High
Frequency of use	Low
Flow of events	<ol style="list-style-type: none">1. The system allows the User to change their account details2. The User selects the either email, name or phone number to be edited3. The chosen attribute will be updated
Alternative Flows	<ol style="list-style-type: none">1. The User selects the 'Change Password' button and enters their new password2. The account password will be updated once the User enters the OTP sent to their email
Exceptions	None
Includes	None
Special Requirements	None
Assumptions	None
Notes and Uses	None

2.1 SearchAttraction

Use Case ID	2.1
Use Case Name	SearchAttraction
Created By	Dhaded Aditya Mahalingeshwar
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	Allows the User to search for attractions
Preconditions	None
Postconditions	User is allowed to make bookings or read reviews
Priority	High
Frequency of use	High
Flow of events	<ol style="list-style-type: none">1. The system shall display a search bar that Users can use to search for attractions based on location, type, and availability.2. The system shall provide filters for users to narrow their search results based on attraction type, price range, and user ratings.3. The system shall display a list of available attractions that match the search criteria in an easy-to-read format.4. The system shall allow users to sort search results by price, rating, and location.5. The system shall allow users to view details, book and/or review a selected attraction.
Alternative Flows	None
Exceptions	If the search is invalid, the system will display the particular exception.
Includes	None
Special Requirements	None
Assumptions	None
Notes and Uses	None

2.2 ViewDetails

Use Case ID	2.2
Use Case Name	ViewDetails
Created By	Dhaded Aditya Mahalingeshwar
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	The system will display the details of the attraction chosen
Preconditions	The User has selected a particular attraction
Postconditions	The User is allowed to flag reviews if necessary
Priority	High
Frequency of use	High
Flow of events	1. The system shall display a detailed page with the attraction's description, images, pricing information, timings and reviews/ratings, etc.
Alternative Flows	1. The User is navigated back to the search listings if he/she clicks the back navigation button.
Exceptions	None
Includes	Searching for an attraction
Special Requirements	None
Assumptions	None
Notes and Uses	None

2.3 BookAttraction

Use Case ID	2.4
Use Case Name	BookAttraction
Created By	Dhaded Aditya Mahalingeshwar
Date of creation	February 8, 2025
Date last updated	February 11, 2025

Actor	User
Descriptions	The system will display the details of the attraction chosen
Preconditions	The User has selected a particular attraction
Postconditions	The User is allowed to make payment
Priority	High
Frequency of use	High
Flow of events	<ol style="list-style-type: none">1. The system will display available dates and time slots for booking.2. The User will indicate the number of tickets required3. The system shall prompt users to confirm their selection before proceeding with payment.4. The User is redirected to the payment portal after clicking 'Confirm Booking' button.
Alternative Flows	None
Exceptions	None
Includes	Searching for an attraction
Special Requirements	None
